Contributors

Cassian Humphreys

Cassian is a Merrist-woodian graduate (NCH- arb- 1991) qualified to Diploma level in Australia

(09), his career commenced in Horticulture (85) and transitioned into Arboriculture (89). An experienced tree climber, instructor, arboriculturist, consultant, educator and writer, he has 30 years of experience. He sees his work as making a contribution to the Australian arboricultural profession.

Jim McArdle

B.Ed. Sc (Sydney), Dip. Arb. (Ryde), VTRA@QTRA qualifications. Director at McArdle Arboricultural

Consultancy and TCAA President, Jim's career spans across almost 40 years and focuses on consulting and reporting in tree risk protection and management plans and tree impact assessments.

Jamie Gray

Jamie has been a professional photographer in Sydney for over two decades. He is the owner

of Camera, Hammer and Tong, who provides digital content for small businesses in and around the tree and construction industry. He is also a photo journalist and the product feature editor for What Tradies Want magazine. But he's just as comfortable with a hammer in his hand as a camera and pen.

National Tree Day

Dates for Australia's largest community tree-planting event announced.

Co-founded by Planet Ark and Olivia Newton-John in 1996, National Tree Day has grown to where this year the aim is to plant one million new trees in Australia.

National Tree Day is a call-to-action for Australians to unite and give back to the community and the land on which they live, and so far nearly 26-million trees have been planted by around five-million people in aid of the event.

It's an excellent opportunity to head outdoors and learn about your community while having fun improving the environment. National Tree Day is a great day to lead an assembly about the importance of trees and how they help to keep our environment and atmosphere safe for us to live in.

Discussion on National Tree Day could be around how trees function as an important habitat for lots of different types of wildlife, and looking into the different types of trees that can be found around the world can be a nice lead in to a topic on different environmental habitats. You can also look at how trees provide a source of food for many animals, a good introduction to the topic of biodiversity. **AA**

CMC Aerial Platforms offer a range of compact and highly manoeuvrable spider lifts with market-leading reach.

The CMC spider lifts Global Machinery Sales stock for the Australian market range from 13 metres in height through to 32 metres, and each lift has an impressive outreach, powerful engine and large basket capacity.

Global Machinery Sales has worked diligently with top EWP dealers in America and Europe to bring you the world-renowned leader.

Here are four of the best-selling CMC spider lifts from the huge range Global Machinery Sales currently has in stock and ready to get to work. Get in touch with Global Machinery Sales to take advantage of the instant asset write off which looks like finishing in June this year while GNS still has stock.

The CMC spider lifts Global Machinery Sales stock for the Australian market have impressive outreach, a powerful engine and large basket capacity.

The S18F stands out thanks to its combination of power and ease of use.

CMC 18F

The CMC S18F 17.7m spider lift's simplicity is its greatest strength, making it easy for operators of all skill levels to use. The full hydraulic design, complete with a pantograph and two telescopic boom extensions, plus an articulating jib, makes this lift incredibly versatile and able to tackle a wide range of tasks.

One of the key selling points of the S18F is its portability. At only 2390kg, it can be easily towed on a trailer, making it a great addition to any equipment fleet. This makes it perfect

for contractors who need to move frequently from job site to job site.

The S18F is part of CMC's new F-Series, which is known for its innovation and cutting-edge technology. The S18F stands out thanks to its combination of power and ease of use.

Overall, the CMC S18F 17.7m spider lift is an excellent choice for anyone in need of a reliable and user-friendly aerial lift. Its portability and versatility make it a valuable asset for any company, and its simplicity ensures it will be a favorite among operators.

Easy for operators of all skill levels to use.

Lightweight at just 2984kg, with a maximum working height of 23 metres and a maximum outreach of 12.4 metres.

CMC 23

The CMC S23 23m spider lift is a compact aerial lift that packs a punch when it comes to performance. This lift boasts a double pantograph platform with articulated arms and jib, making it a formidable piece of equipment.

This lift is fast becoming an arborist favorite in Australia

The S23 is the result of CMC's 20+ years of experience in the industry, and it shows in the lift's design. The geometric platform is cutting-edge and incorporates high-quality steels, making it lightweight at just 2984kg. This allows for easy transportation on a trailer, increasing its versatility and possibilities for use.

The S23 has impressive specs, with a maximum working height of 23 metres and a maximum outreach of 12.4 metres. The basket is spacious, measuring 1.4 x 0.7 x 1.1 metres, and has a maximum load capacity of 200kg. The lift's turret rotation is +/- 355° (710° continuous), and the basket rotation is +90/-87° (optional).

Overall, the CMC S23 23m spider lift is a powerful, compact, and versatile option for those in need of an aerial lift. Its compact size and ease of transportation make it a great option for contractors who need to move frequently from job site to job site. The lift's impressive specs and CMC's 20 years of experience make it a valuable asset for any company.

The compact size and ease of transportation make the CMC 23 a great option for contractors who need to move frequently.

Unparalleled manoeuvrability and outreach making the CMC 25 a pleasure to work with.

CMC 25

The CMC S25 25m spider lift is a reliable and feature-rich aerial lift that is sure to impress. With a working height of 25 metres and an impressive 14-metre outreach, this lift is capable of tackling even the most challenging tasks.

The S25 is a self-propelled, tracked, aerial platform, designed with one articulating/one telescopic lower boom and one articulating/two telescopic upper booms, plus an articulating jib on the end. This combination allows for unparalleled manoeuvrability and outreach, making it a pleasure to work with. It has a quick-release, 180° rotating basket with triple safety locks. Standard basket size is 1.70m wide, but other smaller basket sizes are also

available to best fit your application. The S25 comes equipped with many exceptional time-saving features, such as two stabilisation areas and six possible outrigger configurations. With incredibly compact dimensions of 1.01m x 2.045m x 6.05m (WxHxL) in the closed travel position, this serious aerial work platform is capable of entering virtually any door. It comes standard with a quiet diesel engine/240v electric hydraulic power pack, and is also available with a hybrid power source. It takes the place of the best-seller S24, improving its performance and reliability!

In terms of specs, the S25 has a maximum working height of 25m and maximum working outreach of 14m

with 80kg load. It has a max basket capacity of 230kg, jib movement of 90°, turret rotation of +/-360°, and basket rotation of +/-90°. It also has a maximum slope to stabilize of 15°/27%, height/width tracks adjustment of 0.18m, max angle approach of 14°/25%, max travel slope of 19°/34%, and max travel speed of 1.5kmph.

Overall, the CMC S25 25m spider lift is an exceptional aerial lift packed with features to make work easier and more efficient. Its impressive specs and time-saving features make it a valuable asset for any company, and its compact size and versatility make it perfect for contractors who need to move frequently from job site to job site.

Incredibly compact dimensions of 1.01m x 2.045m x 6.05m (WxHxL) in the closed travel position.

CMC 28

The CMC S28 28m spider lift is a true powerhouse in the world of aerial equipment. When the going gets tough, this lift is able to handle whatever challenges come its way. Its unparalleled performance and advanced technology make it an unstoppable platform that is unrivaled in the industry.

The S28 is built with high-performance materials, making it able to work almost anywhere. Its intuitive operating system and unparalleled manoeuvrability make it an extremely versatile platform that can overcome any obstacle. The indication of the error code and a quick and easy operation make it a must-have in any fleet. The performance of the stabilisers even allows it to be self-loaded on a truck.

The S28 has impressive specs, including a maximum working height of 28 metres, a maximum working underground of -6.7 metres, and a maximum outreach of 14 metres. The basket is spacious, measuring 1.7 x 0.7 x 1.1 metres, and has a maximum load capacity of 230kg. The lift's turret rotation is +/-200° (400° continuous), and the basket rotation is +/- 90°. The lift weighs in at 4175kg.

In conclusion, the CMC S28 28m spider lift is a top-of-the-line aerial lift built to handle the toughest jobs. Its advanced technology, unparalleled performance, and versatile design make it a valuable asset for any company. Its intuitive operation and error indication make it easy to use, and its self-loading capability is an added bonus.

The S28 is truly an unstoppable platform that is sure to impress. **AA**

An intuitive operating system and unparalleled manoeuvrability make the CMC 28 an extremely versatile platform.
